NEW HP ProLiant ML330 G6 Server Series

The HP ProLiant ML330 G6 Server gives you the performance and management you need to scale your business as you grow. The ML330 G6 is the new best practice for growing businesses and business with remote branch offices.

Unique system architecture for performance and affordability
The ProLiant ML330 G6 combines the latest Intel® QPI architecture Quad-Core and Dual-Core processor, serial performance I/O and DDR3 memory technology at a price that fits your budgets.

Highly flexible and expandable to meet future growth
Whether your vision for business is to grow with 1 or 5 to 100 or 500 the ProLiant ML330 G6 offers the capability to meet your future growth and competitive needs.

Best tools for remote management, deployment as well as security
HP ProLiant Onboard Administrator (powered by iLO 2 controller), allowing you to manage servers anytime and anywhere.

See page 04 for pricing.

NEW HP LeftHand P400 SAN Solutions

HP LeftHand P4000 SAN Solutions deliver cost-effective, scalable iSCSI storage for customers who are looking for Fibre Channel features and performance but lack the budget or expertise to build or extend out a new Fibre Channel infrastructure. The solutions are based on a clustered architecture, ideal for server virtualisation projects, email and database applications, and includes integrated replication capabilities along with the ability to scale SAN performance non-disruptively. Plus, they use an innovative high-availability approach to storage that provides unique double-fault protection across the entire SAN, reducing vulnerability and cost-effectively protecting your business data.

See page 14 for pricing.

The Tax Break – up to 50% on your next eligible HP purchase

The Federal Government is offering eligible Australian businesses^ an additional tax deduction of up to 50% on the cost of new capital equipment purchased before 31 December 2009. This initiative is designed to encourage business investment, and boost economic activity^.

^Conditions Apply: On 12 May 2009, the Treasurer announced an expansion of the Small Business and General Business Tax Break as part of the 2009-10 Budget. Small businesses will now be able to claim a bonus tax deduction of 50 per cent of the cost of eligible assets acquired between 13 December 2008 and 31 December 2009, and installed by 31 December 2010. All other businesses will still be able to access the Tax Break at a 10 per cent rate previously announced as part of the Nation Building and Jobs Plan on 3 February 2009. The Tax Break expands and extends the temporary investment allowance announced by the Government on 12 December 2008. This statement does not take into account your personal circumstances, and you should seek independent financial and taxation advice to determine if you are eligible for the proposed bonus tax deduction. www.ato.gov.au

Microsoft® Business Solutions from HP Software solutions designed to deliver results

Talk about powerful partnerships. Windows Server® solutions on HP ProLiant bring together all of today's must-have Microsoft® technologies, and put them into one easy-to-use package. This means you get everything you need to have your business up and running fast, only on HP ProLiant servers.

Windows® Small Business Server 2008 – Standard & Premium Edition

All the power-packed features used by larger companies, packaged and priced just for growing businesses like yours.

	Benefit	Product Technologies	Standard	Premium
Strong IT Foundation Tools	**Strong IT Foundation:** • Work in confidence with a flexible and robust operating system that provides a reliable IT platform • Recover files that have been accidentally deleted and recover data on your PCs and servers • Enjoy compatibility and scalability. As your business needs change, easily add users, servers, and applications • Share resources and equipment, such as Internet access, printers, and fax machines, to get the most value from your technology investments	Windows Server® 2008 Standard Technologies	X	X
Grow Your Business Capacity	**Messaging and Collaboration:** • Connect with customers, vendors, and suppliers easily and professionally, with access to contacts, appointments, and files from any Internet-connected PC or a Windows Mobile® phone, so you can be responsive even when you are away from the office • Enjoy advanced e-mail and calendar functionality with seamless end-user collaboration experience and unparalleled security features	Microsoft® Exchange Server 2007 Standard Edition	X	X
	Productivity: • Improve your daily efficiency and improve team productivity with a central repository for storing and sharing information • Boost team performance and collaboration with an internal website that allows you to share, access and update internal documents, coordinate calendars, and participate in discussions	Windows® SharePoint Services 3.0	X	X
	Take Business Online: • Get everything you need to take, promote, and manage a business on the Internet • Present a sophisticated image with communications resources, including e-mail marketing capabilities, business websites, and tools for creating your own website, so you can differentiate your business and present a more professional image to prospects and customers	Integration with Microsoft® Office Live Small Business	X	X
Protect Your Business Data	**E-mail Security:** • Work with e-mail protected from viruses, worms, and spam • Multiple anti-virus engines give layered protection against the latest e-mail-based threats	Microsoft® Forefront™ Security for Exchange Server	X	X
	Network Updates and Protection: • The latest updates keep your PCs and servers current and your network healthy • Easy to read 'green check' reports give you a quick view of your server status • Know your system is protected with deployments of the latest Microsoft® product updates to computers running the Windows® operating system, giving you automatic system checks for new software updates and making it easier to monitor and distribute updates	Windows Live™ OneCare™ for Server	X	X
	Server Protection: • Gives your system protection against viruses, spyware, hackers, and other unwanted intruders and helps protect, maintain, and manage your server	Windows Live™ OneCare™ for Server		X
Greater Insight To Your Business Information	**Database:** • Based on best practices, Premium includes software to run on a second server that is dedicated to supporting a vast number of line-of business applications • A comprehensive data management and analysis solution that makes it possible to use many server-based business applications, such as accounting, business planning, and contact management software, which share a centralised database so that all employees can work from the same information	Windows Server 2008 Standard Microsoft® SQL Server™ 2008 Standard for Small Business		

Windows Server® 2008 – Foundation Edition is here!

The proven and reliable technology of Windows Server® Foundation provides a foundation to run most business applications. It's an affordable platform for the core portfolio of IT capabilities, including file and print sharing, remote access, and security. A simple and familiar Windows® experience makes it easy for organisations to get up and running – and easy to connect employees. As the heart of a true local area network, Windows Server® Foundation lets employees exchange data securely without requiring e-mail or the Internet. Additionally, Windows Server® Foundation provides an easy upgrade path to higher-end versions of Windows Server®, so the customer's IT solution can grow as their business grows.

- Dependable functionality of Windows Server® 2008 tailored to small business needs for up to 15 users
- Familiar Windows® experience
- Easy upgrade path to Windows Server® 2008 Standard
- Extraordinary value at a low price point
- Easy-to-deploy solution

Windows Server® Foundation can grow with your business, providing the ability to upgrade to a higher-capability edition of Windows Server® as needed. Easy availability of skilled manpower, compatibility with most hardware devices, and the peace of mind gained from running a genuine Windows®-based server help you achieve the highest return on investment.

Windows Server® 2008 Foundation

NEW 6GB/sec Small Form Factor Dual Port Disc Drive

End to End solution for HP ProLiant G6 Range

Smart Array technology: The latest Smart Array controllers, are capable of boosting the I/O performance of ProLiant G6 servers up to 200% over the previous generation of servers. Some ProLiant G6 servers already support 6GB SAS today, and the remaining G6 servers will support 6GB SAS with the firmware upgrade now available.

HP's innovative design and integration work of the Smart Array family of products creates customer value that is unmatched in the industry. Use of Smart Array products across multiple applications results in a much lower Total Cost of Ownership (TCO) than any other server storage RAID product.

- 6G SAS technology delivers high performance and data bandwidth and contains full compatibility with 3G SATA technology
- Mix-and-match SAS and SATA hard drives, lets you deploy drive technology as needed to fit your computing environment
- Addition of the battery backed cache upgrade enables Capacity Expansion, RAID migration, and Stripe Size Migration.
- Additionally, Smart Array Advanced Pack license key enables RAID 6 (ADG), 6+0, Advanced Capacity Expansion, Mirror Splitting and Recombining in Offline Mode, Drive Erase, Performance Optimisation-Degraded Reads and Read Coalescing (VOD)
- Support for greater than 2TB in a single logical drive
- Support for HP StorageWorks SAS tape and tape automation products

HP ProLiant Energy Efficiencies

More performance. Better on your budget

The lesser energy you use, the more savings you get and less impact you'll have on the environment. Which is precisely what you can expect with HP ProLiant – high-performance products designed from the ground up to use less power and resources, without any compromise on performance. Today, HP leads the industry with power management solutions that are both environmentally responsible and cost efficient. Here's how we do it:

HP Power Advisor

More power out of every ProLiant

The new HP Power Advisor lets you measure just how much power is being used as you configure servers and racks. So you can ensure that you're getting the best power use possible from your ProLiant. And with new features like Common Slot Power Supply Bays as well as High Efficiency and Right-Size Power Supplies, you have more ways now than ever before to reduce power consumption as well as provide commonality in power supplies across multiple platforms. And, save money, of course.

Check out HP Power Advisor for yourself at **www.hp.com/go/hppoweradvisor**

HP ProLiant Memory

Consistent performance for consistently less

Always-on availability from your server memory, maximum performance from your servers – that's the assurance you get with HP-powered applications. Rightly so too.

HP is known across the industry for constantly studying new energy technologies to make ProLiant memory more efficient, more reliable. And more, well, worry-free.

HP ProLiant Power Supplies

Extreme energy efficiency

Plug in to more savings with power supplies that set the industry standard for energy efficiency. HP offers the broadest portfolio of energy-efficient servers in the market, with most reaching efficiency levels over 90%, the highest energy and cost savings you'll find in the market today.

ProLiant Hard Drives

The power to do more without using more power

Growing businesses these days need more from their hard drives than ever. Not a problem. HP ProLiant hard drives are already ahead of the game with market-leading solutions that are fast, reliable and always energy efficient. Just the confidence you need to keep your business up and running while constantly driving growth.

ProLiant Ambient Temperature Sensor

Optimal performance assured

Overheating? Not an issue with HP ProLiant. At the heart of every server is a temperature sensor, a single device that makes sure your server stays within the optimal operating temperature. That's yet another innovation you can count on for assured performance.

HP-Powered Business Assurance

Power protection systems that protect your peace of mind

When you rely on your IT for critical data and applications, the last thing you need is for power supply disruptions to shut you down. It's the last thing you'll have to worry about with HP's proven Uninterruptible Power Systems (UPS). HP UPSs set the industry standard for power protection. Each system is rigorously pre-tested to counter anything from power fluctuations to nationwide blackouts. In other words, reliable back-up power that keeps your business running, even when nothing else is.

HP Tower UPS

Advanced security made affordable

HP Tower UPS is trusted worldwide for safeguarding business assets. That's everything from critical data to computer equipment, all at surprisingly affordable prices.

HP T1000 G3 UPS, INTL **$780** inc. GST

- Part Number AF449A

HP T1500 G3 UPS, INTL **$930** inc. GST

- Part Number AF451A

HP T750 G2 UPS, INTL **$600** inc. GST

- Part Number AF447A

HP Rack UPS

Add rock-solid security to your server

HP rack-mountable UPSs give you industry-renowned protection and performance, all while helping you save valuable rack space.

HP R/T 2200 UPS, INTL **$1,690** inc. GST

- Part Number AF411A

HP R3000 VA UPS, 2U, DTC, INTL **$2,690** inc. GST

- Part Number AF414A

Uninterrupted power and protection

Non-stop power. Non-stop performance. That's what you're assured of with HP Power Protection. All you need to do, is remember a few simple steps to ensure you get all the power you need for your growing business:

Put Power Management Software in place

This helps minimise the risk of data loss when turning off your system. How? Power Management Software allows you to build a delay into automatic shutdowns. This ensures that your system saves all your data and closes applications properly before shutting down.

Do not load the UPS past 80%

The initial rush of current to power your server and storage systems could cause an overload. Pushing your UPS capacity to the max also taxes its runtime prematurely. So even though you can load a HP UPS up to 100%, our advice is, don't.

Avoid unnecessary shutdowns by configuring a delay

Yet another reason to set a delay into automatic shutdowns. If something triggers your system to suddenly switch to battery, a delay would provide enough time for your system to check if utility power returns. If power does come back in time, the shutdown will be immediately aborted and your system stays up and running.

Configure the ideal power protection system for your business

See how you can with the HP Rack and Power Configurator:

HP StorageWorks Essential data protection for your business

Simple. Affordable. Reliable. That's how you want your IT storage to be. And that's what you get with HP – dependable and flexible solutions designed specifically for businesses like yours. Priced competitively, HP StorageWorks delivers low-cost, high-value technology that maximises your IT budget. And there's always the assurance of knowing you're using another proven product from HP, each one engineered for reliability today and growth-readiness tomorrow. All in all, it's just what your growing business needs and more.

HP RDX Removable Disk Backup System

Affordable and easy to use

- Portable, durable and shock proof disk based backup
- Forward & backward compatibility eliminates costly future upgrades
- Stores up to 320GB of data at speeds of up to 108GB/hr
- Includes HP RDX Continuous Data Protection Software

HP StorageWorks RDX320 Internal Removable Disk Backup System **$799** inc. GST

NOTE: 0D1 will appear after this part number on your sales order if factory integration is indicated.

- Part Number AJ767A

HP StorageWorks RDX320 External Removable Disk Backup System **$849** inc. GST

- Part Number AJ768A

HP DAT 160 Tape Drive

Compatibility & Durability

- Durable DAT media
- Minimises cost with backward compatibility with DAT 72 and DAT 40 for a seamless upgrade
- Stores up to 160GB of compressed data at speeds of up to 50GB/hr

DAT 160 SAS Internal Tape Drive
$1,090 inc. GST

- Part Number Q1587A

DAT 160 SAS External Tape Drive
$1,190 inc. GST

- Part Number Q1588A

HP Ultrium LTO Tape Drive

Ultimate Performance

- Highest capacity (1.6TB compressed per cartridge) and fastest performance (576GB/hr) half-height tape drive in StorageWorks range
- The ultimate direct attach data protection solution for growing businesses
- High capacity reduces costs by requiring fewer data cartridges to complete backups

HP StorageWorks LTO-4 Ultrium 1760 SAS Internal
$3,890 inc. GST

- Part Number EH919A

HP StorageWorks LTO-4 Ultrium 1760 SAS External
$3,990 inc. GST

- Part Number EH920A

HP StorageWorks Data Protection Automation

Less time to worry, more time for your business

HP designs automated data protection solutions for businesses with limited IT budgets and resources that are looking to enhance their data protection strategy by leveraging the benefits of using both disk and tape. HP D2D Backup Systems emulate tape with SATA HDDs, providing reliable, automated daily backups of servers in a single, self-managing device. Storing backup data on a disk-based system can result in quicker data recovery in the event of data loss.

D2D2503i Backup System

$8,990 inc. GST

Intelligent & Versatile

Struggling with timely restores of files that have been accidentally deleted or corrupted? The D2D Backup System lets you retain up to 50 times more data across multiple servers in a single back-up process. The result – efficient storage, fast restores and cost-effective offsite back-up and recovery.

- Features HP Dynamic deduplication for low bandwidth, highly cost-effective data replication over any Wide Area Network
- Automate and consolidate server backup onto a single, intelligent, rack-mountable device
- Integrated into your existing environment
- 3TB of disk storage

• Part Number EH945A

Data Protection is critical

Your business runs on information. HP makes sure it's always up and running with products and resources that enhance your data storage tasks. Share, consolidate, and protect data quickly and easily with time-saving products that are easy to deploy and manage. Start with proven expertise to help you choose and deploy the ideal solution. Moving from internal to shared server storage is easy with innovative migration and deployment tools. And, optimise file serving with 20% more speed, 35% more efficiency. At the end of the day, you can rest easy with backup and recovery products that protect all your important data. With HP, there are no barriers between you and success.

HP Network Attached Storage (NAS) Add extra capacity, take away stress and hassle

Powerful yet easy to manage, HP StorageWorks X1000 Network Storage Systems are Windows®-powered shared storage solutions for a fast, hassle-free way to make room for your growing business needs.

HP StorageWorks X1400 2TB SATA Network Storage System

$5,399 inc. GST

What's inside?

- Intel® Xeon® Processor 2.00Ghz
- 2GB Memory
- Smart Array Controller with 1 internal SAS port for internal drives and 1 external SAS port for expansion
- 4 x 500GB SATA 7.2K LFF Hot-Plug midline drives
- 2 x Gigabit Ethernet Ports
- Part Number AP786A

HP StorageWorks X1600 6TB SATA Network Storage System

$10,990 inc. GST

Note: image differs from server configuration and is for illustration purposes only

What's inside?

- Intel® Xeon® Processor 2.26Ghz
- 6GB Memory
- Smart Array Controller with 1 internal SAS port for internal drives and 1 external SAS port for expansion
- 6 x 1TB SATA 7.2K LFF Hot-Plug drives
- 2 x Gigabit Ethernet Ports
- Hot-Plug redundant power supply
- Part Number AP788A

HP StorageWorks X1800 2.4TB SAS Network Storage System

$13,990 inc. GST

What's inside?

- Intel® Xeon® Processor 2.4Ghz
- 6GB Memory
- Embedded Smart Array Controller 2 internal SAS ports for internal drives plus integrated Smart Array Controller with 2 external SAS ports for expansion
- 8 x 300GB 6G SAS 10K SFF DP Hot-Plug drives
- 4 x Gigabit Ethernet Ports
- Hot-Plug redundant power supply and fully redundant Hot-Plug fans
- Part Number AP792A

What can shared storage do for you?

Shared storage such as network storage systems provide a more flexible, intelligent, and manageable storage resource that not only keeps up with today's business challenges, but also adapts to your changing needs. This central system based on server technology allows you to share capacity amongst users and other servers accessing your existing network (LAN). Need to free up more capacity? You'll be able to do it remotely via any web browser in just a few clicks if there is enough disk space on your NAS.

Rather than adding individual disk drives or external drives to your system, shared storage allows you to add more drives and share as you need it, making storage more efficient and better on your budget.

What is an X1000 Network Storage System?

HP StorageWorks X1000 Network Storage Systems are enhanced Windows®-powered shared storage solutions, designed just for businesses like yours. Each is built on industry-standard HP ProLiant servers and comes pre-installed with Microsoft® Windows® Storage Server 2008 operating system.

Just like any other Network Attached Storage (NAS) device, HP X1000 systems connect via Ethernet, offer optimised file serving for heterogeneous clients, and install in minutes. The included iSCSI target also means you can connect to servers or virtual machines to host application storage. And with its Windows®-based interface, integration into your Windows® environment is simple, antivirus and backup applications run right on the box, and management has a familiar look and feel. So you can add shared storage fast and get back to what really matters: running your business.

HP StorageWorks iSCSI SAN

HP LeftHand P4000 SAN Solutions delivering on the promise of virtualisation

Unlock virtualisation potential

Virtualisation is a great way for your IT organisation to battle today's economic challenges. You can reduce costs through server consolidation – which in turn increases ROI as you run multiple workloads and applications on a single server. Don't risk losing what you gain with server virtualisation to inefficient storage.

iSCSI SAN solutions offer you storage for virtualised environments that addresses all the potential pain points around cost and management. Go one step further – to iSCSI SANs with a scale-out architecture, like the HP LeftHand P4000 SAN, and you gain additional advantages in terms of scalability, high availability, disaster recovery and performance.

Get started today

If you're thinking about storage virtualisation, think HP. Our LeftHand P4000 SAN products have all the features you need to build a high performing virtualised environment – plus HP's award-winning support. With a pay-as-you-grow, all-inclusive pricing model and intuitive storage management software, the LeftHand P4000 SAN range is perfect for the budget-minded.

HP LeftHand P4300 12TB SATA Starter SAN Solution

$24,990 inc. GST

Perfect for consolidating storage for Windows or Linux servers, the P4300 SATA Starter SAN delivers all the features required to simplify storage and grow non-disruptively with your environment.

Components:

- 2 x HP LeftHand P4000 enclosures each with 8x 750GB 7.2K SATA HDD
- All inclusive HP SAN/IQ software
- 3 Year Next Business Day 9x5 onsite support with software updates
- HP LeftHand P4000 SAN Basic or Advanced Training (1 seat, expires after 90 days)

• Part Number AT016A

HP LeftHand P4300 4.8TB SAS Starter SAN Solution

$29,990 inc. GST

Perfect for first time virtualisation projects, the P4300 SAS Starter SAN delivers the performance and features required to simplify storage and grow non-disruptively with your environment.

Components:

- 2 x HP LeftHand P4000 enclosures each with 8x 300GB 15K SAS HDD
- All inclusive HP SAN/IQ software
- 3 Year Next Business Day 9x5 onsite support with software updates
- HP LeftHand P4000 SAN Basic or Advanced Training (1 seat, expires after 90 days)

HP BladeSystem c3000 Start Up Offer

Making it easier than ever

Before adding on to your IT infrastructure, ask yourself what you can take away instead. HP BladeSystems let you upgrade your IT equipment without adding more boxes, more wires, more maintenance and more costs.

HP BladeSystem c3000 Start Up Offer

$9,900 inc. GST

Over $26K worth of value for under $10K

HP Bladesytem c3000 Start Up Offer includes:

Tower or Rack Server Includes	
• HP BladeSystem c3000 Tower Enclosure with 8 Insight Control Suite Trial Licenses	$9,900 inc GST
• 20 Credit Proactive Select Package (SIM install and Server Migration)	$10,826 inc GST
• HP Startup BladeSys c3000 + Operating System Installation Service	$2,679 inc GST
• 5x HP Server Migration Pack 1 Mig +1YR-24X7 Support Nm License	$2,750 inc GST

HP is really taking the effort and uncertainty out of upgrading your infrastructure with the HP BladeSystem c3000. It is easy. Easy to install, to service and support, to migrate from your legacy x86 infrastructure all with the help of your own dedicated HP engineering specialists by your side.

In this package, HP engineers will provide for the customised installation and startup of your c3000. This service includes: the custom installation of hardware and software, configuration activities and orientation of your new BladeSystem*.

Also included is HP's Proactive Select service which provides you with a HP Account Support Manager (ASM) to work with you to replicate your existing servers using Server Migration Pack (up to 5 servers) onto your new BladeSystem. Your HP Account Support Manager will also demonstrate the capabilities of SIM and provide knowledge sharing of the tool and how you can leverage this to better manage your environment. (Note, if you do not require migration, you can utilise the ASM's time for other activities that are more relevant to you. This can be determined upfront in consultation with you ASM).

That's over $16K of value at no additional charge. There has never been a better opportunity to future proof your IT environment. And by combining, storage and networking needs into an all-in-one system, the HP BladeSystems also minimise power consumption and space required.

HP BladeSystem c7000 Start Up Offer Making it easier than ever

The BladeSystem c7000 enclosure provides all the power, cooling, and I/O infrastructure needed to support modular server, interconnect, and storage components today and throughout the next several years. The enclosure is10U high and holds up to 16 server and/or storage blades plus optional redundant network and storage interconnect modules. Power is delivered through a pooled-power backplane that ensures the full capacity of the power supplies is available to all server blades for maximum flexibility and redundancy.

HP BladeSystem c7000 Start Up Offer

$11,000 inc. GST Over $29K worth of value for $11K

Many companies are implementing blade technologies in their IT infrastructures to reduce cost of ownership and improve flexibility. If your company is one of these, you may be expanding your HP BladeSystem environment to run more of your key applications. As you do this, how do you make sure that you are using blade technology to your best advantage and achieving your service-level objectives? How do you continue to improve the operation of your data centre while keeping power and cooling costs under control? How do you most effectively use blades as part of a virtualisation strategy? And how can you be sure that you have the right management practices and security in place to optimise and protect your BladeSystem infrastructure? The HP BladeSystem c7000 Start Up Offer is a perfect way to start on the journey to truly adaptive and available IT infrastructure.

HP Insight Control

Server management that frees you to manage what really matters

Companies these days need to be focusing on their business plans instead of fussing around with server management. And that's exactly why there's HP Insight Control. This integrated management software lets you monitor, deploy and control your server from almost anywhere. Put simply, it's total server management made simple.

HP Systems Insight Manager (SIM)

Know your own server

Resolve potential issues in your server even before they become an issue. HP SIM makes it easy to monitor your system, react to problems and avoid downtime by alerting you when there's a potential system problem. Think of it as an essential first step to taking control of your IT systems.

Find out more and get the latest information on SIM at **www.hp.com/go/sim**

HP Insight Remote Support Standard

Remote control your server

Monitor and respond to any sign of hardware failure 24/7, from absolutely anywhere. It's yet another way HP helps set-ups like yours solve problems before they even occur:

- Secure remote support for all HP servers and storage
- Easy to install and simple to use
- Quick notifications and service dispatch once potential issues arise
- Available at no extra cost with HP

Find out more about HP Insight Remote Support at **www.hp.com/go/insightremotesupport**

HP Insight Server Migration Software For ProLiant 3.7

Normally **$490** inc. GST
Now **$357** inc. GST

Moving up made easier

Upgrade to your next server solution, without any problems. HP will make sure of it with the fastest and easiest server migration software around:

- One simple interface for all your ProLiant physical and virtual migration needs
- Move existing servers and their content to the latest HP ProLiant, BladeSystem or virtualisation platforms with minimal fuss
- Save time and reduce errors with automated migration processes
- 1 year of 24x7 Technical Support and Updates
- 1-time migration only

HP Total Care Total solutions for your every business need

HP provides complete coverage for your server and storage IT infrastructure

In fact, HP provides complete coverage for the entire lifecycle of your IT infrastructure – from choosing it, configuring it, protecting it, tuning it, all the way to recycling it. This beyond-the-box philosophy, called Total Care, is now customised to the needs of small and midsized businesses so that you can make more efficient use of your limited IT resources and staffing.

With HP Total Care, you get personalised support through one of HP's many local authorised resellers, allowing your local IT advisor to address all your IT needs. In tandem with HP's resources, HP's local resellers will work closely with you to select and implement the appropriate solutions to address your specific requirements and desired business outcomes. HP can also help you finance your solution using the HP Financial Services leasing program which offers you more control over cash flow, a flexible way to grow capital expenditures and reliable, built-in asset management and IT support.

Solid IT support at a competitive price

Lean IT staffs are often a reality in businesses like yours. That's where HP's Care Packs can help. This new Total Care program delivers beyond-the-box services from HP and selected local partners at a fixed price. You can choose from a variety of clearly stated, easily selectable services. This includes hardware and software support, proactive services and support, network and security services, as well as deployment and installation. One of the most popular Care Packs is the HP Hardware Support Onsite 6-hour Call-to-Repair Service. When you call, HP support specialists go to work to return your system to operating condition within a committed maximum of six hours from the initial service request.

HP provides a wide array of server and storage technology, services and expertise designed to meet the needs of your company. With HP Total Care, your business can receive the support it needs when you need it most, at a price you can afford. In other words, when you choose HP, you never just buy a server or a storage system. You get access to our extensive experience, expertise and insight to maximise your IT resources and optimise your business performance – just what your business needs during these changing times.

HP Server Buying Guide

Are you getting what your business needs? Based on your planned usage, our Server Buying Guide helps you find the right ProLiant server in just two clicks, so you won't ever waste money on specifications and features you don't need.

For starters, here are some helpful tips to help you find that perfect server:

- Tower servers are ideal for small, remote or branch office environments, offering maximum in-chassis flexibility and all-inclusive server/storage solutions.
- Rack servers are ideal for data centres and external storage, offering maximum computing power in a space-saving design.
- Blade servers are ideal for data centres and external storage, offering maximum computing power while minimising space usage, power consumption and cooling needs.

HP Storage Selector

Expand your storage capacity or build it from scratch with our Storage Selector. Find the perfect solution by simply choosing the features, drive information and operating system and leave the rest to us.

Find your perfect storage solution now at **www.hp.com/go/swd-selector**

HP Total Care Financial Services

Maintaining an up-to-date IT platform is essential for the competitive success of almost every business – and it can serve as an equaliser for small and midsized businesses. Increasin gly, IT fuels everything from back office operations to customer sales and service.

Chief among the choices facing businessmen looking to take advantage of growth opportunities is whether to buy IT systems or lease them. Given the continuing advances in IT and evolving nature of today's business environment, companies also must develop a schedule to refresh their IT infrastructure on a regular basis.
